**atclose**  
appraisal · title · closings

An end-to-end cloud-based title closing software

As a cloud application, AtClose users can access their Title & Settlement information from any browser anywhere, anytime, and from any device. Since no special hardware or software installation is required, AtClose on the cloud yields excellent ROI.

To accommodate businesses with special regulatory or security requirements, AtClose real estate closing software is also offered as an on-premise deployment, allowing the client complete control over security and compliance.

## AtClose Settlement Process

## Why AtClose?

By implementing AtClose, many businesses in the Title & Settlement industry have significantly improved their bottom line. AtClose real estate closing software includes conveniently pre-configured data for the nation's top underwriters, which expedites document preparation.

With its high level of customizability, our suite of solutions adapts to the specific operational processes of your business, significantly reducing closing time. This combination of value, ease of use, adaptability, and performance makes AtClose an ideal choice for Title & Settlement businesses of any size.

### Key Features
